

City of Lawrence  
Traffic Safety Commission  
P.O. Box 708  
Lawrence, KS 66044

February 2, 2004

To whom it may concern:

The Breezedale Neighborhood Association would like to request that the traffic safety commission consider constructing a speed bump (or other speed calming device) on the 2300 block of Massachusetts Street (between 23<sup>rd</sup> St. and Indian Ave). This section of Massachusetts St. is an access road to Haskell Indian Nations University and has considerable traffic when school is in session. Many of the drivers who use the road greatly exceed the speed limit and/or drive irresponsibly (drag racing, etc).

The traffic on this block is of particular concern to the residents who live on Massachusetts Street. However, this street is also used as a pedestrian route for residents throughout the neighborhood and Haskell students. The Breezedale neighborhood also has a number of young children, all of whom cross this street and walk along this block on a regular basis. This issue needs to be addressed before someone is hurt.

The Breezedale Neighborhood Association would like the City of Lawrence to conduct the traffic studies required for building a speed bump on the 2300 block of Massachusetts Street as soon as possible. Because this traffic issue is related to Haskell, the study should be conducted while school is in session. If this stretch of road does not meet the requirements for a speed bump, we would like to discuss other methods of making our neighborhood street safer.

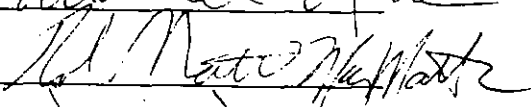

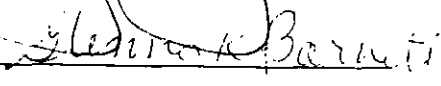

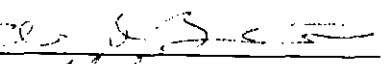

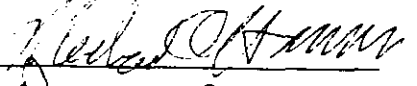

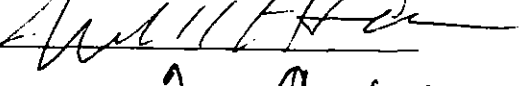

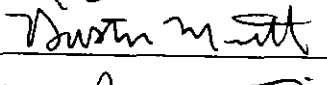

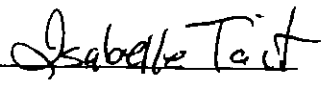

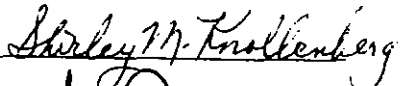

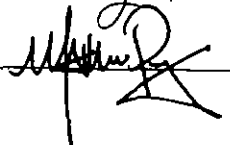

Thank you,  
The Breezedale Neighborhood Association  
and the residents of the 2300 block of Massachusetts Street.

## Support for Speed Humps on 2300 block of Massachusetts St.

A study conducted on February 19<sup>th</sup> by the City of Lawrence concluded that the 2300 block of Massachusetts St. meets the conditions for the construction of two speed humps. The tentative sites for these humps are just north of Winona and just south of Pawnee. Before final approval and construction of the humps, the city requires the consent of 70 percent of the residents living with 300 feet of the proposed humps. Please sign below if you support this effort to improve safety in our neighborhood.
