

5 July 2005

Traffic Safety Commission
P.O. Box 708
Lawrence, Kansas 66044

To Whom It May Concern:

Our names are Dan and Carol Abrahamson, and we have lived at 944 Lawrence Avenue since 1963. There is a problem with the traffic in front of our home: the posted speed limit is 25 mph, but we observe daily, many who drive (in our estimation) upwards of 50 mph on Lawrence Avenue between 9th Street and Harvard.

On occasion, we have called the police department about this problem, and they have willingly come out with their radar to slow things down. But as soon as the radar is gone, the speeding starts up again. We do not expect the police to constantly monitor our street.

Today I talked with David Woosley, and he recommended that I write to your commission about our problem. We very much like the "speed humps" that are located on Arizona Street between 6th and 8th Streets and wondered if something similar could be used on Lawrence Ave. Mr. Woosley explained that Lawrence Avenue is a "feeder street" and needs to provide proper passage access for firetrucks and ambulances, but that the city does have a "new" type of speed hump that would allow for emergency vehicles to pass safely.

We respectfully request that the traffic safety commission do a study on traffic calming for Lawrence Avenue.

Most sincerely,

Dan and Carol Abrahamson

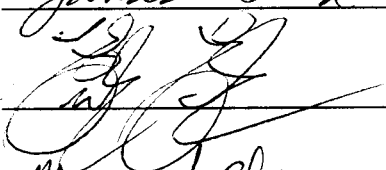

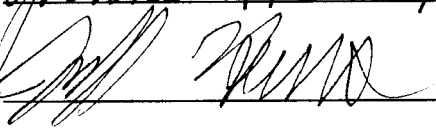

Cc: David Woosley

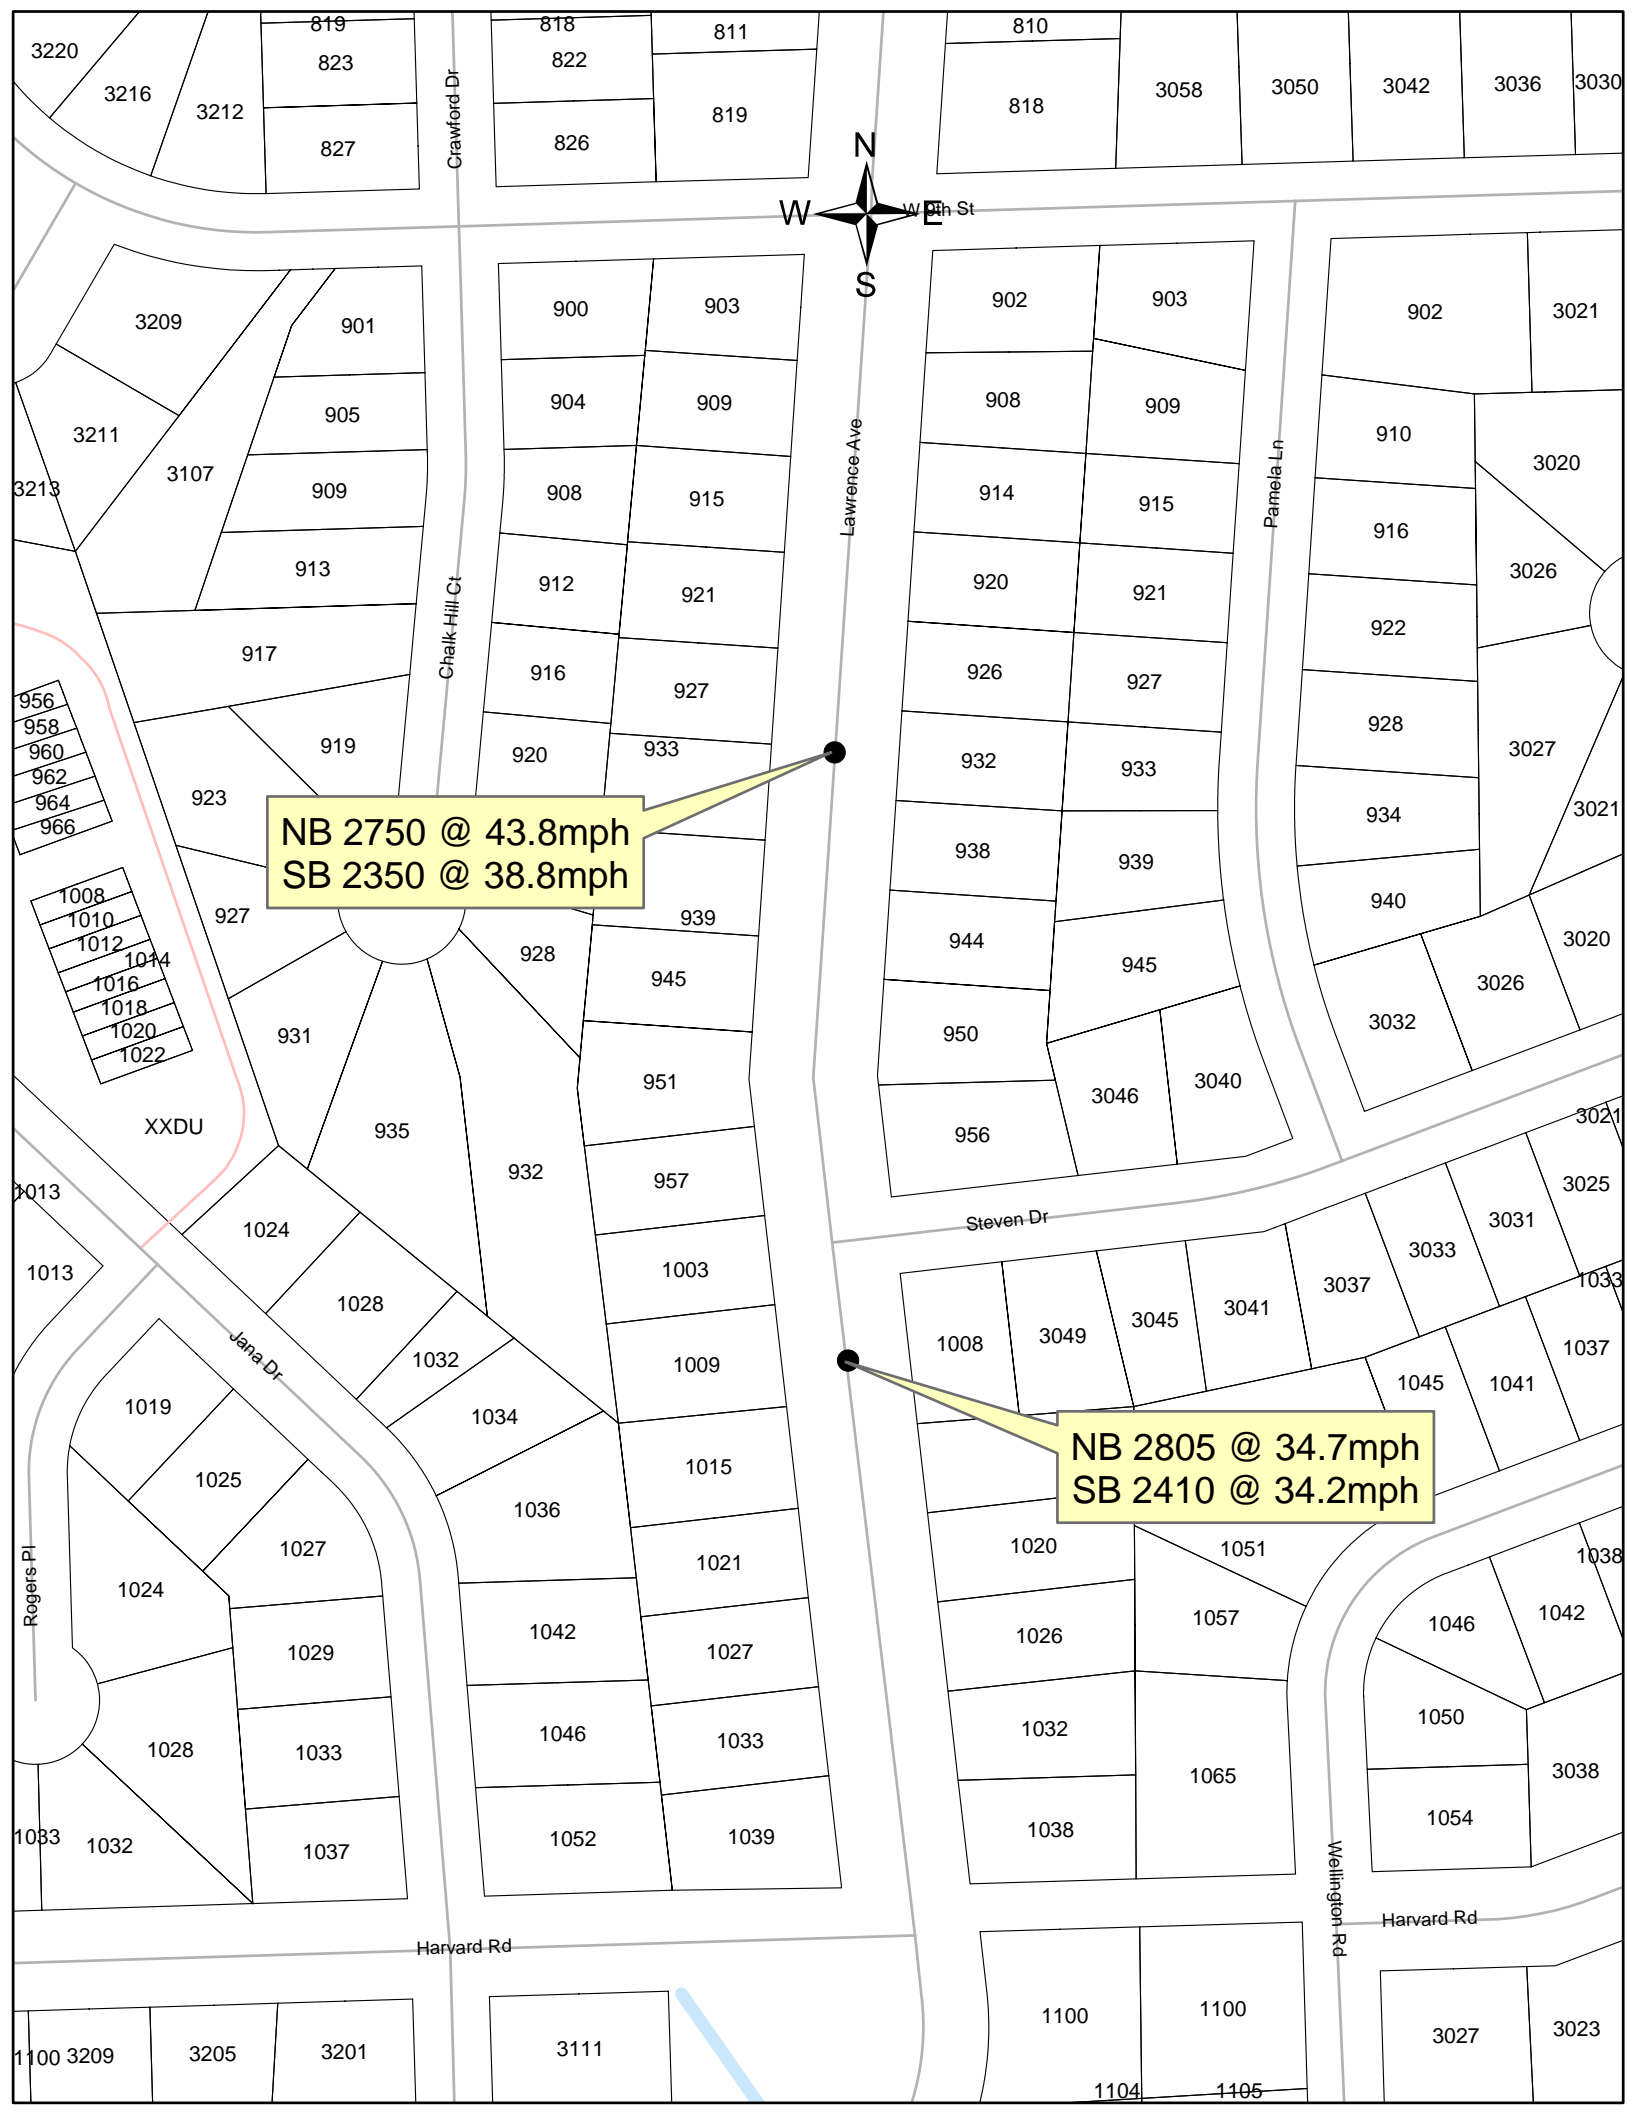

PETITION

Date: July 27, 2005

We, the undersigned home owners on Lawrence Avenue, within the area from 9th street to Harvard, do hereby support the construction of a speed bump(s) to slow the flow of traffic.

1. Walter Hicks Johnne Hicks 920 Lawrence Ave
2. Edw L. Brown 926 Lawrence Ave.
