

Dear City Commissioners and
Planning Office,

We are the residence of the East end of Golden Rain Drive. We would like express our concern of the direct impact of the Construction and traffic that will result from the Sherylville Estates Project.

We believe that some of the first Construction will be the Streets, Sidewalks & Curbs of the building sites. We would like to request that all Construction traffic be limited to the North Eastern roadway. According to the map we have been provided this would be Rebecca Lane.

Our Street has Curb Side Parking on both the North & South Side of the Street which Causes limited Access for normal everyday traffic. It has been our experience in past with new Construction across the Street that there is a lot of Construction debris that are left in the roadway, causing hazards to our Vehicles.

We would also like to ask that we be given at least 3-4 day notice of any construction that would or could possibly affect our existing property.

Your attention to our concerns + requests would be greatly appreciated.

Thank you.

Mary Banks
