Re: Turnpike Interchange.

Dear David:

I represent a group of concerned citizens in Leavenworth County who are opposing the KTA interchange at Leavenworth County Road No.1 North of Eudora.

As you will recall, an Eastern Bypass was proposed and approved by the City of Lawrence in the mid 1980s.

My clients would like the opportunity to address the Lawrence City Commission to discuss an eastern bypass as an alternative to the current proposal at County Road #1. We believe the new route and interchange should serve as a true bypass for through traffic between the South portion of the Kansas City Metropolitan area and points west of Lawrence. A direct link is needed between K-10 and the turnpike, and the current proposal fails to provide that link.

Please let me know when the City Commission agenda will be able to accommodate a brief presentation on the issue.

Thanks in advance.

Sincerely,

Price T. Banks
