Judge's Comments:

I like the fluid-ness of the full-screen, but it needs to be better optimized. Too blue/grey (ie. Boring) . 23 character search box is one of the better ones in this category, but consider upping to 25-27, as suggested by usability expert Jakob Nielsen (you've got the room). 1 HTML error. Very nice footer! All sites should be this neat and organized. Consider adding email address to all footers after phone # (you have the room). Used a favicon. Homepage has 3 Accessibility Issue failures, per the FAE Rule. Used tables instead of DIV tags to format content. Interactive Map hard to find. Online parking/traffic/H2O payment! XHTML 1.0 Transitional. Aggregator.css valid. Event.css valid. Node.css valid. Defaults.css valid. System.css valid. User.css valid. Style.css valid. Print.css valid. TJK_ToggleDL.css - 1 error. TJK_ToggleDL_ie5mac.css valid. No breadcrumbs, but consistent navigation throughout! This was one of my top 4 sites - If you don't win, address issues and resubmit next year!

Judge's Comments:

content - links to lawrancechamber all 404; accessibility - 5 known problems on home page, 5 on boards page; standards - 7 errors on home page in HTML Validator

Judge's Comments:

97-Beautiful design. Really gave a sense of the City. Great Accessibility Statement with links to additional information and help.
