Dear Commissioners:

I am writing to request your support in funding Project 23 of the 1996 Stormwater Management Master Plan, calling for major system reconstruction to provide flood control for 8th and Ohio. This project will provide relief from flooding for 8th & Ohio, 8th & Tennessee and 7th & Tennessee that currently exists in Old West Lawrence.

We ask that you fund Project 23 immediately.

Sincerely,

July 17, 2018

Lawrence City Commission
6 E. 6th Street
Lawrence, KS 66044

Dear Mayor and Commissioners:

On behalf of the Lawrence Police Officers' Association, I would ask that when making decisions on setting the maximum allowable amount for the budget tonight, you take into consideration the fact that negotiations for our MOU are still ongoing, and have not reached resolution on pay. The City's negotiating team has indicated to us that no general wage adjustment has been budgeted for 2019 for police MOU employees. We intend to show that our wages are at least 5.5% behind our peer cities, and have requested a 3% general wage adjustment in our most recent proposal.

Our understanding is that you may decrease the budget based on need in August, but you may not increase it after tonight, so we wanted to be sure this information was included for your consideration. Thank you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Drew Fennelly', with a large, stylized flourish at the end.

Drew Fennelly
LPOA Chairman

Brook Creek Neighborhood Association

Melissa Fahrenbruch, President

1322 Maple Ln, Lawrence KS 66044

Telephone: (970) 534-7987

e-mail: brookcreekna@gmail.com; meljofah@gmail.com

To whom it may concern:

Brook Creek Neighborhood Association would like to echo East Lawrence Neighborhood Association in their concern about the change in priority of splash park locations. There has been a long standing plan to include a splash park along the Burroughs Creek Trail as part of the Rails to Trails plan in the Lawrence Parks and Rec master plan. There is also a plan that has recently been submitted to the planning commission to build bathroom facilities at Burroughs Creek park which would make this location even more ideal for the inclusion of a splash park.

This location would be in close walking distance to the East Lawrence Recreation center, the new DIY skatepark, Sunrise project, East Heights which will be the new home of Parents as Teachers, and Edgewood. The location is also near a bus route making it a wonderful location for children both inside and outside of the neighborhood. This corridor could become a prime summer destination for children with easy access to the free lunch program and many activities.

It would also be sad to lose the wading pool as it is such a historic part of Lawrence history. The town could easily support an additional water amenity rather than having a replacement or having it next to the existing pool further crowding parking in that area. The Burroughs Creek Trail is heavily used by the community for both transportation and recreation and this would be a wonderful addition.

Please consider following the original Rails to Trails plan and including a splash park in Burroughs Creek park rather than moving priorities to add additional amenities to the Downtown area.

Sincerely,

Melissa Fahrenbruch
BCNA President

re: Massachusetts St. protected bicycle lanes

Mayor Boley and Commissioners:

You are aware of two serious bicycle-automobile collisions that occurred in June this year, one at 9th and Indiana St., and one on Monterrey Way and Spring Hill Dr., 700 feet south of Peterson Rd. In both cases, the street has unprotected white-stripe bicycle lanes, the cyclist was traveling in the bicycle lane, the motor vehicle failed to yield right of way, and the driver didn't see the cyclist. And in both cases, the cyclist was critically injured and taken to Stormont Vail Hospital.

The Sustainability Action Network is not supportive of installing any more unprotected white-stripe bicycle lanes. They were fine a decade ago to get Lawrence "off the dime" of having built no bicycle lanes at all. But they have proven to be inadequate, unsafe, a potential legal liability for the City, and are virtually invisible to the typical motorist. National statistics from multiple sources indicate that 61% of the potential bicyclists choose not to ride for safety concerns. But data from other communities and survey results indicate that, if provided with protected bicycle lanes, the numbers of everyday cyclists jump - [Survey: Protected bike lanes have seven times the impact of striped ones.](#)

The Pedestrian-Bicycle Task Force lists it's number two recommendation to improve the safety on roads where there have been bicycling collisions. Specifically the report says on page 36 "For improving safety for people riding bikes on Massachusetts St., a protected bikeway should be built between 11th Street and 23rd Street".

In light of local bicyclist injury events and national safety statistics, we are asking the City Commission to take action on projects and policies. The MSO project #CIP# PW18E10 has been approved for buffered bicycle lanes on Massachusetts between 11th St. and 14th St. We are asking the Commission to identify 2019 funds to extend this project all the way to 23rd St. But to make the lanes protected, we request that plastic lane delineators be added to the buffered section, along with green lanes across all intersections, providing the visibility needed for a protected bicycle lane.

Beyond that, we request the formal adoption of a policy to build only fully separated bikeways from now on, as Mayor Boley has called for. These can take on the configuration of on-street protected lanes, or cycle tracks immediately adjacent to motorist lanes.

thank you,
Michael Almon, Program Manager
Bicycles & Multi-Modal Transportation

Dear Friends,

Many of you know of the difficulties we have experienced with our property at 812 Ohio.

We purchased the property with the intent of replacing the current house with a home that would fit Old West Lawrence and would allow us to enjoy downtown Lawrence.

Shortly after we purchased the property, we learned that there is a large storm water drainage line running below the property. No recorded easement for this line was discovered by two separate title searches. This 107-year-old stone storm water line carries the majority of runoff from K.U.'s Jayhawk Boulevard, under our house to the Kansas River. At its current location and at a depth of approximately 3-1/2 feet, the undocumented line has rendered our lot unbuildable.

A 1996 Storm Water Management study commissioned by the City forecast flooding of the Old West Lawrence area. Project 23 of that study corrects the Ohio and 8th Street issues that are currently causing flooding in the area and was given the second highest priority for implementation. 22 years have passed and the City has taken no action to correct this problem. Failure will only become more likely with the increased development on campus. The estimated cost for completing Project 23 is \$500,000.

Regretfully, after multiple meetings with the City Manager, the City Planning Director and the City's attorneys, our concerns have been ignored. The City has informed us that there are no plans to fund this project.

We are hopeful that you will join us in requesting that the City do the right thing and address this problem immediately.

We plan to attend future City Commission meetings, starting on July 17. We would welcome your support at these meetings.

Enclosed is an addressed, stamped envelope and letter to the City Commissioners that request immediate funding for Project 23. If you support this effort, please promptly sign and mail the enclosed letter to our City Commissioners. If there are two residents in your home, you may both sign.

Sincerely,

Donna Geisler & Sarah Merriman

I don't understand why the City hasn't funded this basic, fundamental municipal necessity (Project 23).

Similarly, I don't understand why the City claims there is no money for sidewalk repair — requiring homeowners to individually assume this expense — yet the City has \$2.5 million to spend on a new Animal Shelter. People should come before animals.

This project will not only solve flooding problems - it will allow for improvement of the Old West Lawrence area by allowing an existing structure to be replaced with a more appropriate structure.

July 10, 2018

Lawrence City Commissioners
City Hall
P.O. Box 708
Lawrence, KS 66044

Dear Commissioners:

In April 2017, colleagues of mine purchased the 812 Ohio Street lot in Lawrence with the intent of razing the existing home there and building a new structure that would be in keeping with the Old West Lawrence guidelines for homes fitting that area. No recorded easement was discovered at the time of the lot purchase after two separate title searches were made that did not show the undocumented Storm Water Drainage line that runs through the lot property.

After having purchased the lot, it was found that an existing Storm Water Drainage line that was installed in 107 years ago was shown on an old geographical map, running 35 feet behind the existing house. Minimal excavations on the property have confirmed that the Storm Water Drainage line actually runs across the 812 Ohio St. property and it exists within 3 ½ feet of the ground surface. This Storm Water Drain carries runoff collected from KU Jayhawk Boulevard and from other contributing streets down the hill to the Kansas River.

An architect researching the lot for plans consulted the website "Lawrence Geographical Information System" in May of 2017 and found that a 1996 Storm Water Management study had been commissioned by the City regarding pooling of storm water pooling at 8th and Ohio Streets. Project 23 of that 1996 study recommends correction of current flooding conditions in the 8th & Ohio area, and it was given the 2nd highest priority 22 years ago for reconstruction. Project 23 was never scheduled nor funded for completion by the City of Lawrence.

The above information provides specific facts in a request for the City Commissioners to support funding Project 23 of the 1996 Storm Water Management Master Plan. Project 23 calls for major system reconstruction to provide flood control for the 8th and Ohio Streets in Lawrence. This project will also relieve flooding that currently exists for 8th and Tennessee Streets, and 7th and Tennessee Streets in Old West Lawrence.

Please provide funding for Project 23 immediately.
